Bootstrap Course

Duration: 45 Days (Daily 1½ Hours)

Bootstrap is the most popular HTML5, CSS3, and JavaScript framework for developing responsive and mobile friendly projects on the web. Bootstrap is a Twitter Inc. project free of cost available to develop responsive websites all over the world. Our institute Bootstrap course is a 1 month training course covers all the nuts and bolts of Bootstrap to develop a 100% responsive website. Particularly we focus on CSS, Components, JavaScript implementations, Less & SASS, and customization of Bootstrap in our course.

Eligibility Criteria to Join our Advanced Bootstrap Course

Candidate must have knowledge of HTML5, CSS3, JavaScript, and jQuery to learn Bootstrap. Previous website designing experience is highly expected from the candidate to join our Bootstrap Course.

What You Study :

ADMEC Multimedia Institute is first institute that offered a course in Responsive Website Designing in 2012 and now we offer 2 complete courses in it. We are the first institute which offers 6 months long program in responsive website design in Delhi, India. Our instructors are veteran professionals of UI development. Come and meet, I am sure you will be amazed.

Why Join Us? :

Bootstrap is neither a software nor a application it is a framework. Don't join an institute if they teach it like an application. We promise come to us we will teach you it as a frameworkkkkk....

Learning Methodology :

We believe that theory and practical are two pillar of any subject to get the mastery over that. So our mentors focus equally on both of the skills to prepare for the industry.

Career Options :

Bootstrap Developer and Responsive Website Developer
